

Thread Tapping Technology

Observation of Process parameters

New Software Development „WinPCA3“

The expanded “**screening & analysis software**” WinPCA3 has specially been developed for the demands of the lubricant industry as well as for the tapping tool- and coating-manufacturers

Due to the torque coverage the TTTsystem is also used for screening and monitoring optimised process parameters with automatic recording of production, processing and quality assessment

Options / Features

WinPCA_VIEW

WinPCA3

Level “0“ PC-display software. Only cut-, torque- and progress in depth at processing (threads) is diagrammed. Software is available for delivery of „microtap“ & “megatap“ thread tapping units

WinPCA_TAP

Level “1“ PC-Software for comparative value observation with allocated storage of definable series of measurements

WinPCA_TAP

1.000€

Instruction & Training

500 €

WinPCA_TAP SW for several PC's

500 € pro Arbeitsplatz / Rechner
